

HITGLOBAL with our partner in the region Phyll Technology Innovation were chosen to train TAI engineers in the following courses: Bell 412 Overhaul, Advanced Field Maintenance, and Bell 412 EP to Epi Differences.

HTIGlobal and Phyll International Thank our customer TAI for contracting us to train their technical staff.

THAI AVIATION INDUSTRIES - TAI

TAI is Thailand's aircraft repair and maintenance service center. The Thai government approved the establishment of TAI on September 23, 2003, by the Royal Thai Air Force. TAI's headquarters is located at Dom Mueang. TAI started its operation on January 29, 2004.

Thai Aviation Industries Co., Ltd's headquarters at Dom Mueang started its operation on January 29, 2004. The company's service center at Nakhon, Sawan Province, officially opened on April 29, 2004. Their service standard follows the rules of the Department of Civil Aviation. One year later, the company expanded its services and opened two new maintenance services centers for light planes, aircrafts, and flight training at the Flying Training School (Nakhon, Pathom Province) and Flight 604, Dom Mueang. In 2005, the company also set up a tool, measurement testing, and calibration center. In 2006, TAI opened its Piston Engine Repairing Division (Dom Mueang), Propeller Repairing Division (Dom Mueang), and Aviation Electronics Repairing Division (Dom Mueang). At the end of the year, the Helicopter Repair Center opened at Lopburi Province.
